Instructions for Family Tree Worksheet

1. As always start by filling in the Date and Created by at the top of the first page. Then assign this chart a number.
2. If someone on this chart is also on another of your charts, fill in the "Person No. ___ on this chart is Person No. ___ on Chart No. ___." The first Person No. is their number on this chart. The second Person No. is their number on the other chart. Finally the Chart No. is the chart number of the other chart.
3. The father of this family is listed as person number 1. The mother is person number 2. Fill in a number for each child.
4. The fields are pretty self-explanatory. However at the end of each field is a "/". After the "/" place the number of the source. The source number will come from the source pages. Each source you get information from, give it a number. Then fill in the rest of the source information.
5. The source information is generic. Customize as necessary depending on the type of source you use. See Citing Sources for further information.
6. At the top of each Sources page is "Page ___ of ____." Fill in the first blank every time you start a new page, page 1, page 2 …. Then when you are done, the number of the last Source page is also the total number of Source pages you have. That is the number that goes into the "of ___" blank. So it should look like this…. Page 3 of 8.
